

## Capabilities

Whether you are considering a project in a new or existing facility, our experienced staff is confident in analyzing the necessary requirements and providing you the full service of our capabilities;

- Equipment and Facility Analysis
- Design Experience
- Pharma Process Experience
- Ergonomics/ Design Mock-Up
- Engineering
- Manufacturing
- Integration
- Testing
- Documentation
- Post Installation and Start up Service
- Preventive Maintenance

### Staff Experience:

Russell Krainiak, provides more than 22 years of direct experience in design and construction of barrier and isolation systems, having very unique experience in biological, chemical and nuclear containment system. Russ holds a B.S. in Industrial Engineering, and is author of several technical papers, as well as an officer (Board of Directors) of the American Glovebox Society, the primary engineering association for this type of technology. Russ is also a member of ISPE (International Society of Pharmaceutical Engineers). He is author of several documents pertaining to AGS and author of Chapter 7 (Glovebox Ventilation Design) for the new Department of Energy Handbook.

Ronnie Harris, provides more than 20 years of direct experience in design and construction of barrier and isolation systems, having very unique experience in biological, chemical and nuclear containment system. Ronnie holds an associate degree in mechanical drafting and design. Ronnie is a member of ISPE (International Society of Pharmaceutical Engineers) and AGS (American Glovebox Society). He works with the Standard Writing Committee developing the next "Guideline of Practices" for AGS.
