VETERAN CONTAINMENT GROUP FORMS

INTEGRATED CONTAINMENT SYSTEMS, L.L.C.

Springfield, MO – We are pleased to announce the formation of Integrated Containment Systems, LLC. The new company provides high-level containment/isolation products and systems designed to protect facilities and employees in the pharmaceutical industry.

Denise McIntosh, of Custom Powder Systems, is the firm's Executive Officer. Russ Krainiak, former Director of Technology with Global Containment Systems, Inc., is Director of Technology. Ronnie Harris, former Engineering Manager with Global serves as Director of Engineering.

"We looked at the industry and realized there are opportunities we could easily accommodate," said McIntosh. She added, "chief among these are long lead times and a lack of functional containment technology. Our organization can facilitate the entire process and deliver high-end, technology driven products on a timely basis."

For more information contact Russ Krainiak or Ronnie Harris, 252-946-0166, Integrated Containment Systems, L.L.C. 1 Commerce Square, Washington, NC 27889

Integrated Containment Systems is a fully integrated supplier providing design, engineering, scheduling, manufacturing, testing, documentation, preventive maintenance and post installation service.
